# FILTER CART

Our filter cart (part # HFC-1) provides a convenient easy way to transfer and filter various types of oil. Use it with your in-plant machinery and hydraulic applications to remove particles and water from your system.

Dual Filter setup provides both particle removal and water removal. Easy change of filters to accommodate the cart to your needs. Features a 1HP 120 volt motor to drive 6gpm gear pump provides efficient fluid transfer and filtration. High wheeled for easy moving, clear PVC hoses with ball valve shutoffs and quick disconnects for easy storage.

Our filter carts are completely customizable to fit your needs.

## Applications

- Transferring New Oil
- Cleaning Stored Oil
- System Draining
- Line Flushing
